## More than Taking an Order: The Importance of Skill Development in Employment through the Lens of the Fast Food Industry for Students in a Life Skills Setting

Erin Smith Feerick- Kensington CAPA High School Teachers Institute of Philadelphia

Learning about America and About the World from McDonald's: An Interdisciplinary
Approach

### Abstract

This unit seeks to engage students in a high school life skills classroom with the skills necessary to attain and maintain jobs related to the fast food industry. The service industry is a steadily increasing job sector for high school students. A simple google search can lead to upwards of 3,000 open positions in fast food in one zip code alone. Many of these students have the desire to work in the realm of fast food, but are unaware that working at McDonald's requires more skills than asking the question, "Would you like fries with that?" Through this semester long unit students will experience the day to day job requirements of McDonald's and other fast food employees through, videos, ethnography, interviews and simulated job experiences. Culminating their experiences in a short power point presentation to their peers about the myths, realities of working in the fast food industry. This unit will be geared toward students in a high school life skills classroom and will extend over a ten-week period with each lesson being approximately 90 minutes in length once per week. Through this unit students will engage in the real life and simulated situations based around the social or soft skills needed to gain and maintain meaningful employment in various aspects of the food industry. Lessons will be aligned with both the PA common core and the individual transition goals as stated in each students Individualized Education Plan (IEP).

### Rationale

## **Target Audience**

This unit is designed for students in a high school Life Skills is this classroom the majority of students are identified as a being students with Intellectual Disabilities (ID). In the state of Pennsylvania, a student with an IQ under 75 is considered to have an intellectual disability. Ranging from the ages of 14-21 these students are approaching graduation and transitioning from the classroom setting they have known from a young age into the workforce. Students should be exposed to the different forms of employment available to them beginning at age 14. As the students ages grow closer to 21 they should begin going into the fields and experiencing jobs through the supports of a job coach and or other supports to assist them cognitively to complete assigned task. The students this unit is aimed towards have little to no experience with jobs in the fast food realm. This unit starts at the bottom and works towards a broad end with students expanding their awareness of jobs available at McDonald's and the

### **Food Service Industry**

The service industry is a steadily increasing job sector for high school students. A simple google search can lead to upwards of 3,000 open positions in fast food in the 19122 zip code alone. Fast food workers, in the notion that students are accustomed to, are the first contact between the customers and the restaurant. They are responsible for ensuring customer satisfaction and addressing any questions or comments that customers may have. Students may not be aware of the many tasks fast food workers perform. These tasks involve taking customer orders, assembling the orders, and acting as cashiers. The food is then served through "drive thru" windows or over counters in the restaurant. Students may be aware of these jobs, but do not have an understanding of the needed skills to attain and sustain these jobs. Through this unit students will explore the different jobs that the McDonald's Corporation has to offer and also the skills, risks, and benefits associated with each of these jobs as related to their own personal strengths and weaknesses as explored through a previous unit on personality and career traits.

## Using the Lens of McDonald's

Fast Food is a concept that is well known among high school aged students. Historically, McDonald's has been known as a hangout for teens due to the very quick service and relaxed atmosphere. Teenagers are very familiar with the sights, sounds, and smells of a McDonald's restaurant. However, many teens are unaware of the long hours of standing and working with difficult customers that come with working in the fast food industry. For example, in a typical McDonald's a worker is on his or her feet for the entirety of their shift working directly serving others. With these drawbacks in mind and using the familiarity of McDonalds as a bridge for students this unit will help students ease into the concept of employment and will help them make connections with the environment. The familiarity of the setting and what they have witnessed in McDonald's restaurants throughout the years will help them quickly learn the expectations of the job. McDonald's also has a proven track record for providing on the job coaching and support for employees with special needs.

### Transition services for students with special needs

As this unit is geared towards students in a high school life skills setting putting IEP transition goals at the forefront of planning is important. According to the Ross and Bateman (2018), "Employment rates among prime-aged adults with disabilities in the 100 largest metropolitan areas range from 28 percent to 60 percent". With this statistic in mind, it is important to expose students with intellectual disabilities to jobs that require various levels of functional skill. The Individuals with Disabilities Education Act (IDEA) is a federal law that lays out a student's rights in special education. Students over the age of 14 according to IDEA are required to begin receiving services in the area of transition. This portion of the law which is exemplified through Indicator 13 of the State Performance Plan required by the Individuals with Disabilities Education Act of 2004 is

the percent of youth with IEPs aged 16 and above that have an IEP that includes appropriate measurable postsecondary goals. The goals are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP team meeting with the prior consent of the parent or student who has reached the age of majority.

## **Content Objectives**

Through this unit students will engage in the real life and simulated situations based around the social or soft skills needed to gain and maintain meaningful employment in various aspects of the food industry. Students will have the opportunity to engage in the process of applying for gainful employment from the experience of writing a resume, to completing a job interview, followed by learning the necessary skill sets needed to apply for maintain and secure employment at a fast food restaurant, such as McDonald's. Listed below are several example of lesson objectives:

- Complete a self-assessment of strengths and weaknesses
- Communicate verbally and in writing their intention to work at a specific job location
- Locate needed information within a job application
- Demonstrate through class participation the skills needed to maintain a job using the school Prepared, Respectful, On time, United as a community, Dedicated to learning (PROUD) motto by
  - o Being on time to class and task
  - o Being in uniform
  - Using appropriate language, as they would if working at McDonalds
  - Working with peers and listening to directives
  - Completing assigned task in a timely manner
- Complete a sample job application for McDonald's
  - This application will be modified, but students will have access to the unamended version via the internet
- Create a resume highlighting strengths and interests
- Complete an interview and/or observation of one McDonald's employee and share his/her role with the class
  - o Present finding with class via a power point presentation

## **Teaching Strategies**

Students with complex special needs learn best through doing tasks. For this reason, all lessons in this unit will be rooted in the Quality Teaching for English Learners (QTEL) vision. While this vision is most often used in association with English language learners, this approach also works extremely well with students with special needs who often struggle in traditionally taught general education classrooms. QTEL is best described as working to provide educators with tools they need to accelerate language development, academic literacy, and disciplinary knowledge. These strategies can be best described as a three act lesson in which students are:

- 1. Introduced to the lesson through a series of open ended exploration based questions and tasks with no right or wrong answers developed to promote higher level thinking and questioning in a safe learning environment. Examples of activities students will use to become acquainted with material are:
  - a. Think, Pair, Share
  - b. Novel Ideas
  - c. Round Robin Sharing
  - d. Brain Dump
- 2. Given interactive tasks in which they engage more deeply with the concept through real world application and materials through conversation and exploration. Some examples of interactive tasks students will be using are:
  - a. Sort and Label
  - b. Read with a Focus
  - c. Carousel
  - d. Sort and Match
  - e. Jigsaw
  - f. Interview
  - g. Observation
  - h. Job Shadowing
  - i. Informal Observations
- 3. Encouraged to expand their learning by becoming the lead learners within the lesson and sharing what they have discovered concretely with the rest of their classmates. Some of the ways students will share their learnings are:
  - a. Final Product
  - b. Collaborative Poster
  - c. Power Point Presentation
  - d. Mock Interviews

### e. Ethnographies

### **PA Common Core Standards**

The standards describe what students should know and be able to do with the English language, prekindergarten through Grade 12. The standards provide the targets for instruction and student learning essential for success in all academic areas, not just language arts classrooms. The standards most commonly used throughout this lesson are listed below:

#### **ELA Standards**

- CC.1.4.11–12.L Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.
- CC.1.4.11–12.X Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
- CC.1.5.11–12.A Initiate and participate effectively in a range of collaborative discussions on grade-level topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

#### **Math Standards**

- CC.2.1.5.B.1 Apply place-value concepts to show an understanding of operations and rounding as they pertain to whole numbers and decimals.
- CC.2.1.5.B.2 Extend an understanding of operations with whole numbers to perform operations including decimals.
- CC.2.2.5.A.4 Analyze patterns and relationships using two rules.

#### **Classroom Activities**

The three sample lesson plans that follow with depicted activities represent the beginning, middle and end of the unit with students completing additional activities and lessons to supplement between lessons connecting working in the fast food industry with required life and vocational skills.

Name: Smith	Kensington CAPA High School School District of Philadelphia
Class:	Life Skills Support - 90 min block
Topic	Applying for a Job in Fast Food- Week 2 of 10 in McDonald's Transition Unit
Standards &	
Objectives:	By the conclusion of this lesson students will be able to

- Communicate verbally and in writing their intention to work at a specific job location
- Locate needed information within a job application
- Complete a sample job application for McDonald's
- Create a resume highlighting strengths and interests

## PA Common Core Standards in Reading, Writing and Mathematics

- CC.1.4.11–12.L Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling
- CC.1.4.11–12.X Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
- CC.1.5.11–12.A Initiate and participate effectively in a range of collaborative discussions on grade-level topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

## IDEA Indicator 13- Vocational Training

 Aligned to the class wide transition goal by the end of a 10 week semester, given explicit instruction and practice on work place expectations and job skills in the classroom and a community setting, students will demonstrate appropriate work place skills and interactions with peers during community based instruction and in the classroom with individual percentages aligned to each individual students

# Prepare Task (15 Mins.):

## Think, Pair, Share

Think: Given a visual on the SMART board students will individually think and list in their notebooks the different jobs/task that they see in the photo.

Pair: With a partner (groups no larger than 3) students will circle the words indicating any similar jobs/task that they noticed

Share: As a pair students will share aloud verbally with the class what they have written in a quick whip around fashion

# Interacting Task (55 Mins):

**Sort and Label (15 min)** – given teacher made cards of job task found in a McDonald's. Students will sort the jobs into self-chosen categories. Student will list categories and tasks on chart paper.

Carousel (10 min) – Students will rotate around the room clockwise discussing with their partners the similarities and differences between their charts and the charts of their classmates.

**Reading with a Focus (25 min)-** in groups of no more than four, students will read the attached (teacher made) job application for McDonald's three times:

Reading 1- silently for clarity

Reading 2- as a group each member reading his/her assigned part

Reading 3- gathering important information on the attached chart that will need to be provided

Completion of the Job Application – working with an elbow- partner students will accurately complete the provided job application

Extending Task (20Mins):	Completion of Resume- students will complete their own resume using the provided template as a resource to highlight their strengths and weaknesses for a job at McDonald's as reflected in this lesson and the previous lesson on strengths and weaknesses
Homework:	Students will complete an internet or community based job search. Bringing in one artifact to present and share next class meeting.

### Daily Activities

## Prepare Task (15 Mins.):

**Novel idea**: In groups of 4 students will label their notebooks from 1-8 and complete the statement:

When I think of a cash register I think of (10 min)

- 1. Money
- 2. Change
- 3. Shopping
- 4. Etcetera
- 5. –
- 6. –
- 7. –
- 8. –

Student groups will then stand and share their ideas one by crossing off ideas that were already given. Once a group has given their novel ideas they will all sit down. (5min)

# Interacting Task (40 Mins):

**Sort and Match** (15 min) Given teacher made cards containing math stories about making change and correct numeric answers in different representations of money. Students will sort and match each scenario to its corresponding correct answer. Students will share within their groups why they choose to match the two cards. If needed, students will share matched pairs in a round robin fashion.

**Jigsaw** (25min) Students will be assigned two groups a home group and an expert group. Students will be completing cashier math problems of varying levels with their expert group and return to their home groups to share their learnings and findings.

# Extending Task (15 Mins):

**Collaborative Poster:** Given a scenario, students will create a story using addition and subtraction based on working a cash register at McDonald's and solve the problem. The collaborative poster should include:

- A story problem
- A visual display of the steps to the solution

	A math problem	
	A title	
	<ul> <li>All students names</li> </ul>	
	* each student will be assigned one color marker and	
	demonstrate group participation by using only their assigned color on the chart paper *	
	Students will complete three sample story problems about cashier math.

### **EDUCATIONAL FIELD TRIP PERMISSION SLIP**

Dear Parent or Guardian:

An educational field trip has been scheduled for your child's class to conclude our transition unit on McDonald's. School board policy requires each child to have advance written permission to go on a field trip. *Students who do not have prior written permission will not be able to participate in the field trip.* 

Please complete the lower section of this form and return it to school immediately.
Thank you.
Teacher: Ms. Smith, Ms. Z and Classroom Assistance Date:
Date of field trip: Approximate Time: 10:00am - 11:00 am
Destination: McDonald's Restaurant on Front and Girard Ave, Philadelphia PA.
Your child will need: Money if he/she would like to purchase anything from the menu
Mode of transportation: Bus School Van WalkingX
Sign, detach and return this portion to Ms. Smith at Kensington CAPA High School I have read the information above and give my permission for (student's name)
From Kensington CAPA High School to attend the field trip to McDonald's
On at 10 am. I understand that my child will be traveling by bus school van walkingX (please check the appropriate one).
Teacher: Ms. Smith Department/Grade: Room 201 Life Skills
Parent/guardian Signature
Emergency Phone Number
Additional Information (medication, allergies etc.)

## Student Field Trip Behavior Agreement

, wish to participate in this educational experience to observe and interview employees at McDonald's. I understand that while I am on a field trip I represent Kensington CAPA High School and that all school rules still apply while on the trip. I promise to be KCAPA PROUD and pay close attention to being respectful to all and remaining united as a community with my classmates while we are guest at McDonald's.

## **Annotated Bibliography**

### **Food Service Industry**

Books and resources with information about McDonald's and other fast food chains.

Mcdonalds Interview: 12 Must Know Questions and Answers

https://worknearyou.net/mcdonalds-interview-questions/

Actual interview questions student may encounter when applying for a job at McDonald's.

Ozersky, J. (2008). *The hamburger: A history*. New Haven: Yale University Press.

As stated on the book jacket this fast-paced and entertaining book unfolds the immense significance of the hamburger as an American icon. Josh Ozersky shows how the history of the burger is entwined with American business and culture and, unexpectedly, how the burger's story is in many ways the story of the country that invented (and reinvented) it.

Schlosser, Eric (2001). Fast Food Nation: The Dark Side Of The All-American Meal. Boston: Houghton Mifflin.

As stated by several internet reviewers: This book, Fast Food Nation describes how the fast food industry has reduced the overall food quality worldwide, created poor working conditions for millions of people and ruined public health.
